
Quest 2: Seeds

Planting Abundance

Time: 1-2 hours | **Reward:** 22 \$ReGen + 1 RVoice

Deliverable:

Adding seeds to swap in your LocalScale profile

The Story

The Seeds quest builds the practice of saving, documenting, and swapping seeds. We become participants in the oldest continuous human technology: the preservation of genetic diversity through care and attention. Every seed saved is a vote for biodiversity, for local food sovereignty, and for a future where communities feed themselves from their own land.

Step by Step

Step 1: Gather Your Seeds

Collect seeds from plants you have grown, traded, or purchased. Consider heirloom and open-pollinated varieties.

Step 2: Document Your Collection

Take photos and note the variety, source, and any growing tips for each seed type.

Step 3: Create Your Profile

Set up or update your LocalScale profile with your seed offerings.

Step 4: List for Swap

Add your seeds to the swap marketplace with clear descriptions.

Step 5: Connect and Trade

Reach out to other seed savers and arrange swaps.

Tips

- Include growing zone information
- Share stories about where seeds came from
- Consider offering seed saving workshops
