

ReGen Civics Quest Field Guide

Regenerative Ikigai

regencivics.earth

What This Quest Is

A minimum 3-day water fast to access the clarity, autophagy, and altered states that extended fasting produces. Return to this quest whenever you need to reset and rediscover your role in the regenerative movement. Repeatable — earns tokens every time with no limit.

Story Card

The body knows how to heal itself. What it needs, more often than any supplement or intervention, is time to stop processing long enough to do the work. When you fast, digestion stops. That energy gets redirected. Autophagy kicks in: cells break down and recycle damaged components. Cellular cleanup the body cannot do while busy digesting. This is not fringe science — the 2016 Nobel Prize in Physiology was awarded for autophagy research. Around day three, something shifts. The hunger quiets. The mind gets cleaner. There is a clarity that is hard to describe until you have been there. The minimum for this quest is a clean 3-day water fast. That is the threshold where something real opens up.

How To Do This Quest

Step 1: Choose your fast.

Minimum for this quest: a clean 3-day water fast (water and herbal tea only, no calories). If you can extend beyond 3 days, do. Set your intention clearly.

Step 2: Prepare your body.

In the days before a longer fast, reduce processed foods, sugar, and caffeine gradually. A clean transition reduces discomfort significantly.

Step 3: Prepare your environment.

Tell the people around you what you are doing. Clear your schedule. Have water, herbal tea, and electrolytes available. Make sure you have somewhere to rest.

Step 4: Fast with intention.

Note how you are feeling at the start, middle, and end. What is your energy? Mood? Clarity? Relationship to hunger? Hunger comes in waves. When it comes, observe it. It passes.

Step 5: Break your fast gently.

Start with fruit, diluted juice, or broth. Give your digestive system a day to rebuild before returning to normal meals.

Step 6: Write your reflection.

Each time you complete a fast, write a brief account. What happened in your body? In your mind? What did you notice that surprised you?

Deliverable

A reflection document for each completed fast: dates, duration, key observations, and what shifted.

Tips

- The hardest part of any fast is the first 4-6 hours. Once past that, hunger becomes more manageable and clarity begins.
- Extended fasting requires electrolytes. Add a small amount of salt and potassium to your water on days 2 and beyond.
- People with diabetes, eating disorder history, or pregnancy should consult a doctor before fasting.
- This quest is repeatable with no limit. Each fast earns tokens.
